

# Local authorities taking action on climate

A summary of municipal climate actions and networks

# Local authorities as active climate actors and networkers

Local authorities have a key role in implementing national and international climate and environmental agreements. Nationally agreed emission reduction targets are translated into action at the local level.

- More than one in two Finns lives in a municipality that has set itself a climate target.
- Local authorities are not on their own, but have united their efforts worldwide.
- There are numerous climate networks and commitments, which are used to advance climate targets in municipal functions and decision-making.
- Municipal climate networks aim at improving regional wellbeing and stimulating business development.
- Local authorities work together with the neighbouring municipalities, businesses, NGOs and local residents.

# Environmental and climate networks of municipalities

## Regional

- Energy agencies (7 regional agencies)
- Climate work of municipalities surrounding the Helsinki Metropolitan Area (10 municipalities)

## National

- Energy efficiency agreements 2017–2025
- FISU network (8 cities)
- HINKU Forum (34 municipalities)
- Mayors' Climate Network (6 cities)
- Society's commitment to sustainable development (81 municipalities, 1 region)
- Municipal Climate Protection Campaign of the Association of Finnish Local and Regional Authorities (56 municipalities and 2 joint municipal authorities)
- Motiva sustainable public procurement network (18 municipalities)
- Smart & Clean (Helsinki capital region – large cities)

## International

- Climate-KIC
- Energy Cities (2 cities)
- Covenant of Mayors commitment (10 large cities and 1 region)
- EUROCITIES – Environment Forum (6 cities)
- ICLEI (14 cities)
- UBC (12 cities)

# Local authorities take climate action in many sectors

- Energy
- Waste management
- Land use planning
- Upbringing and advice
- Sustainable public procurement
- Cooperation between local residents and businesses
- Transport and mobility
- Food
- Digital services and smart technology
- Preparedness

# Examples of different municipalities and climate actions

## Joensuu: Climate Market Place

The project coordinated by the city of Joensuu encourages local businesses, communities and residents to take pro-environmental everyday actions.

## Helsinki: Smart Kalasatama

Image: Laura Oja

A model district for smart energy systems co-created by the city of Helsinki, its energy company, and technology firms.

## Pello: Electric car quick charging point

A quick charging point installed in cooperation between Pello municipality and an energy company ensures smooth travel for electric car drivers along the important Northern routes.

## Kiuruvesi: Local and organic food

Image: Heidi Huhtialainen

Local and organic food has been included as part of the strategy of Kiuruvesi town with the aim of increasing its use in the municipal food services.

## Kuopio: SaVE project

Image: Lentokuva Vallas Oy

A project implemented as part of Kuopio city planning project explored the solar energy and geoneergy potential and use of smart building automation in the district of Savilahti.

## Pudasjärvi: Timber building

The strategy of the town of Pudasjärvi outlines that public buildings must be primarily built from timber.

# There are many different ways of taking action on climate

## Kunnat työssä ilmaston puolesta

Kunnat ovat keskeisiä kansallisten ja kansainvälisten ympäristö-, ilmasto- ja kestävästi kehityksen sopimusten sekä lainsäädännön tavoitteiden toimeenpanjoita. Viime vuosikymmeninä on luotu lukuisia ilmastoverkostoja ja -sitoumuksia, joiden avulla tavoitteita edistetään kunnan päätöksenteossa sekä toiminnassa. Kaikki kunnat eivät kuulu tunnettuihin verkostoihin, mutta ne voivat silti tehdä ilmastotyötä laajasti eri toimialoillaan.

Useampi kuin joka toinen suomalainen asuu kunnassa, joka on asettanut itselleen ilmastotavoitteen. Kunnat ovat sitoutuneet tavoitteisiinsa esimerkiksi tekemällä energiatehokkuussopimuksen, ilmastostrategian tai ympäristöohjelman. Ilmastotavoitteet on voitu sisällyttää myös suoraan kuntastrategiaan.

Kuntaliitto haluaa tuoda kuntien käytännön ilmastotekoja monipuolisesti näkyville. Esimerkkien toivotaan tukevan kaikkia kuntia arvokkaassa työssään ilmaston puolesta sekä innostavan uusiin tekoihin. Lisätietoa verkostoista ja tässä esitellyistä sekä muista kuntien ilmastotoista löydät verkkosivuiltamme [www.kuntaliitto.fi/ilmastoverkostot](http://www.kuntaliitto.fi/ilmastoverkostot)
