

Hälsa för mig

En tjänst från eHälsomyndigheten

halsaformig.se

The Swedish eHealth agency

A governmental agency

- Under the responsibility of the Swedish Ministry of Health and Social Affairs
- Director General: Janna Valik
- Established on 1st of January 2014
- The base-line: state-owned company Apotekens Service
- Approximately 150 employees
- Approximately 50 consultants

The eHealth Agency

- Coordination of government eHealth initiatives
- E-prescriptions in Sweden
- Electronic support systems
- National drug statistics
- National contact point for eHealth
- **Digital Personal Health Record – Hälsa för mig**
- Governance model for standardization and interoperability

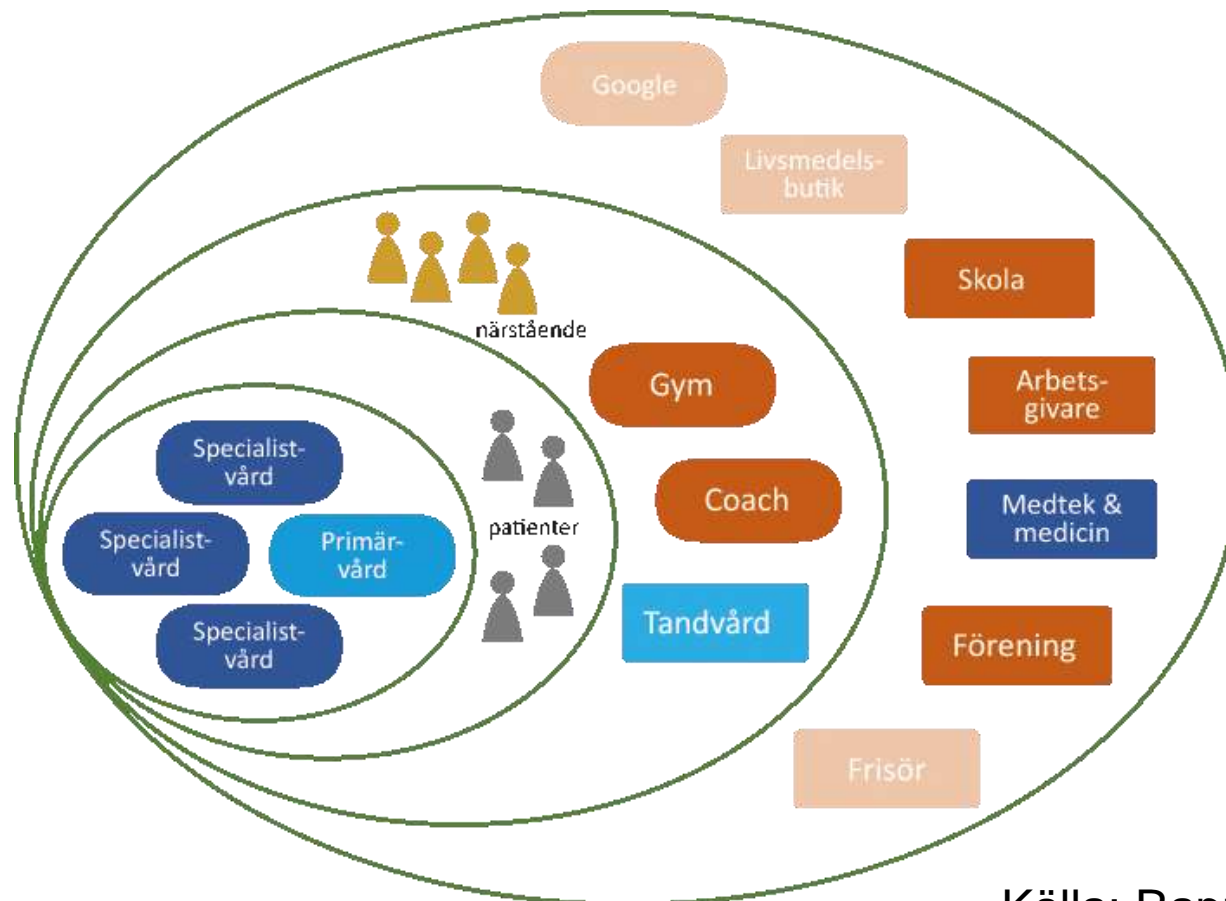

Swedish eHealth Agency by numbers

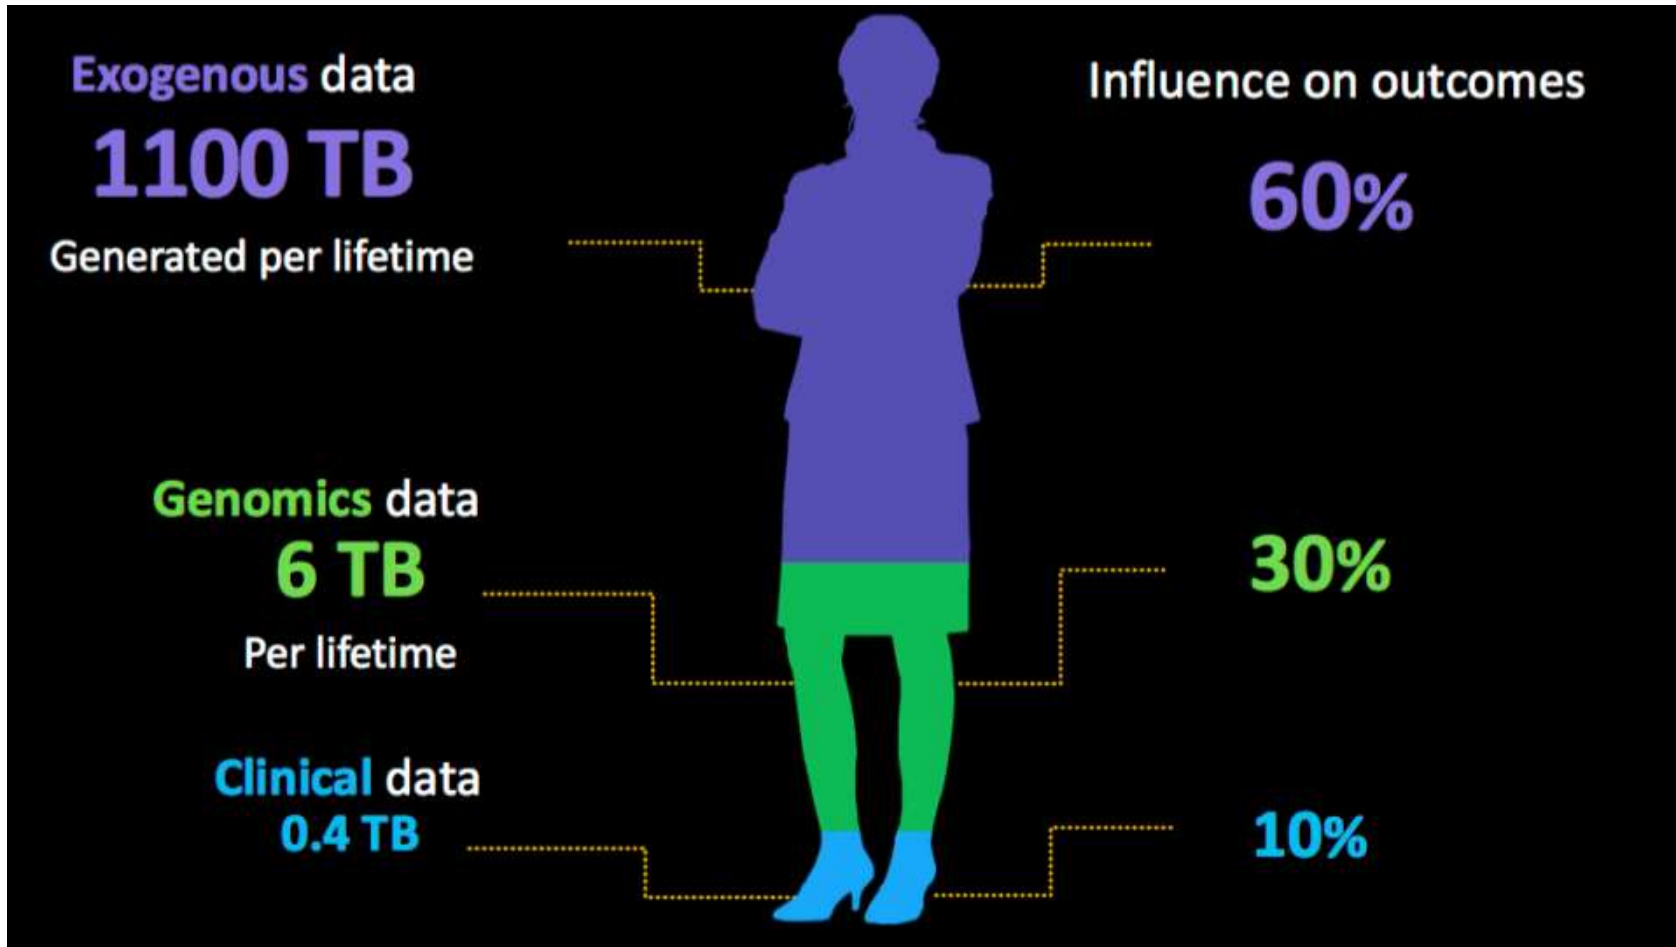

- 70 000 prescribers and 10 000 pharmacists use our services on a daily basis
- The agency processes and administers on an annual basis:
 - 80 million e-prescriptions (99%)
 - 2 billion EUR in government subsidies
- 99,99% availability
- 10 000 request/min (weekdays)
- 20 million request/day

What information should I collect and store about my health today to obtain the best possible healthcare in the future?

Health depends on the whole society and our behavior

Källa: McGovern et al. 2014

eHealth Vision

If we are going to be the best country in the world at digitisation and eHealth we also need to be best in the world:

- in handling structured and portable health data
- stimulating data driven innovation, and
- move from and organisation centric to a human centric data management

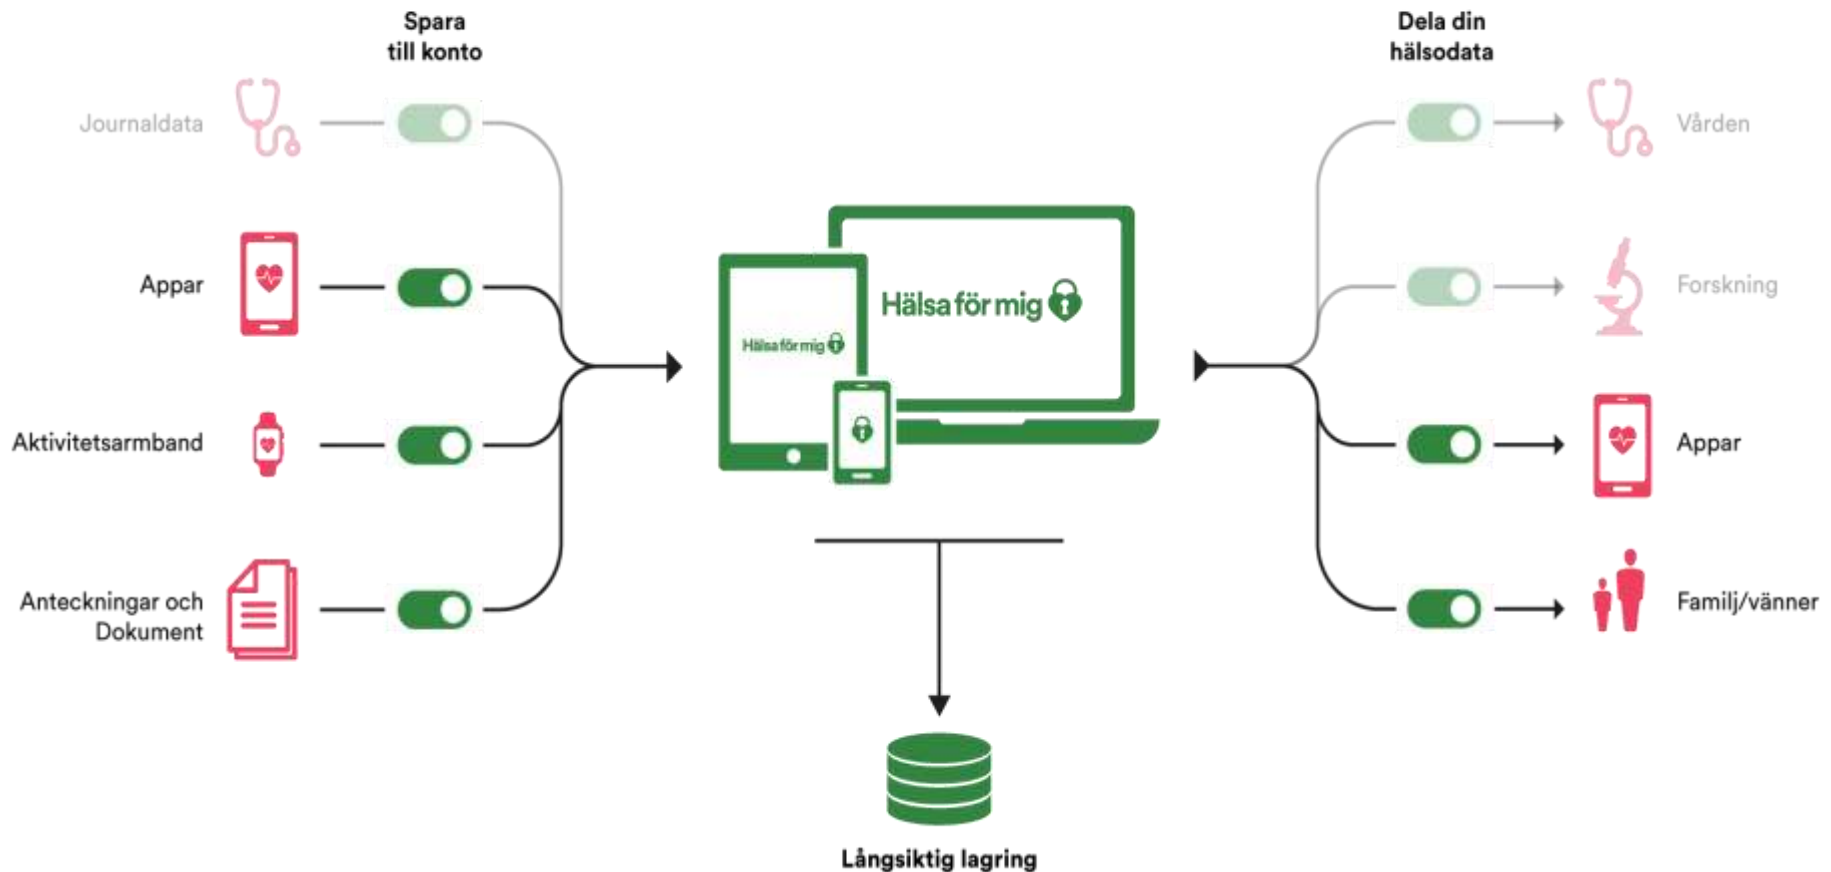

Personal Health Record

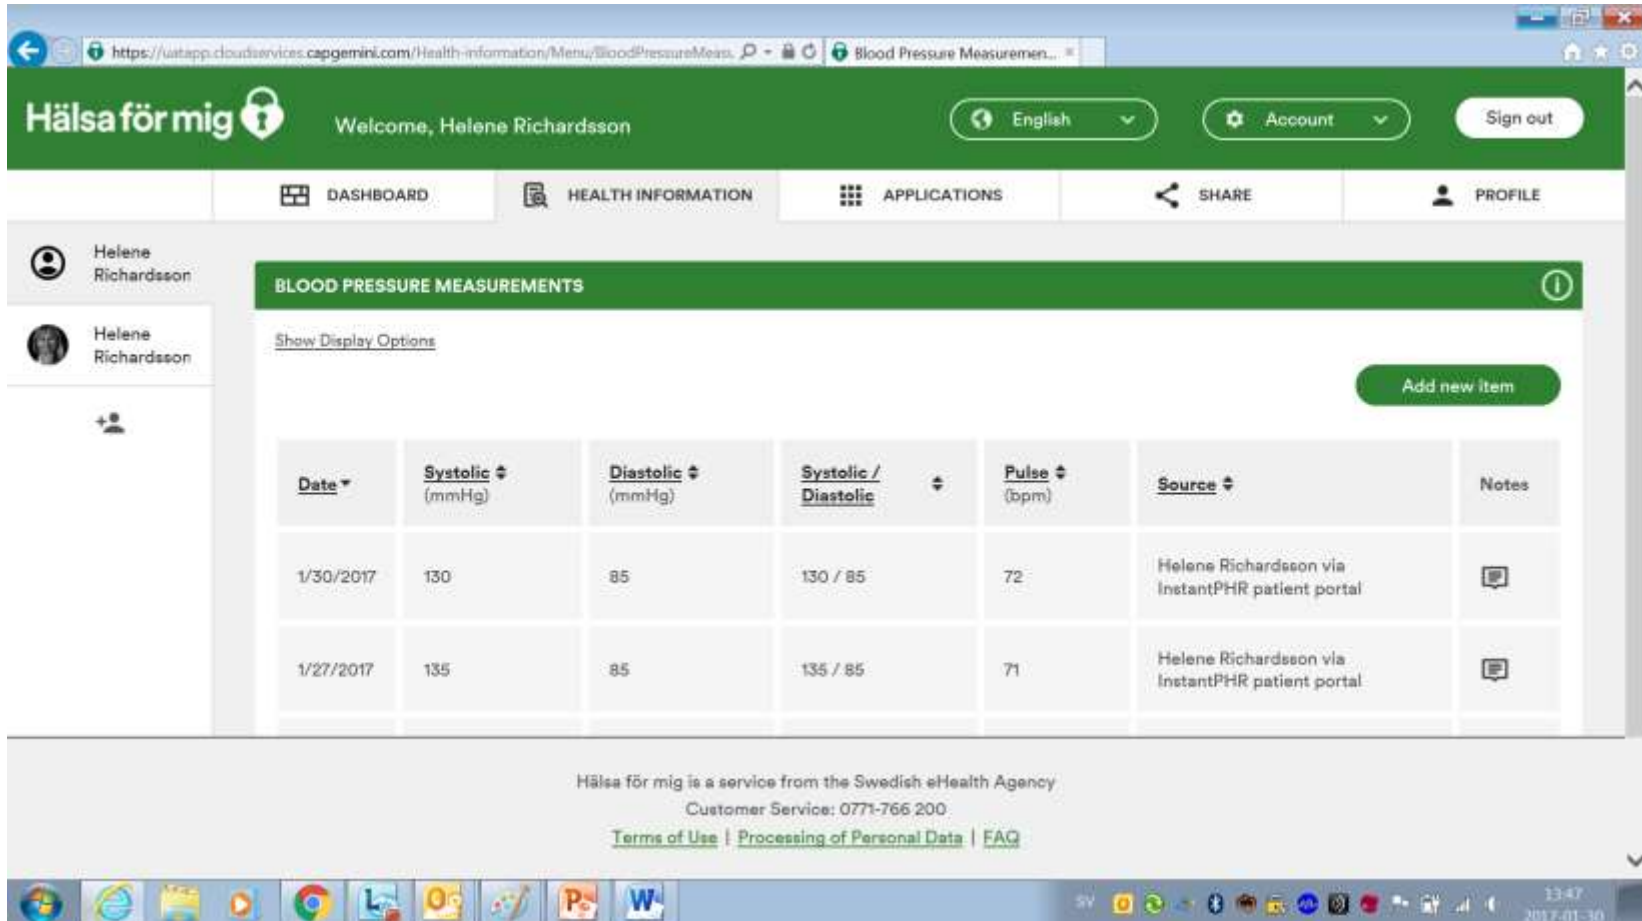

- A political initiative launched by the Ministry of Health and Social Affairs in 2012
- A political project that aims to:
 - Empower the patient
 - Improve and rationalise national health and caregiving
- How?
 - All citizens are given the opportunity to store information about their health in a PHR
 - Platform for third parties to build applications - ecosystem

Everyone should have the right to access and control their own health data and use it freely

What is Hälsa för mig?

The screenshot shows a web browser window displaying the 'Hälsa för mig' patient portal. The user is Helene Richardsson. The main content area is titled 'BLOOD PRESSURE MEASUREMENTS' and contains a table with two entries. The table has columns for Date, Systolic (mmHg), Diastolic (mmHg), Systolic / Diastolic, Pulse (bpm), Source, and Notes. The first entry is from 1/30/2017 with a reading of 130/85 and a pulse of 72. The second entry is from 1/27/2017 with a reading of 135/85 and a pulse of 71. Both entries were recorded via the InstantPHR patient portal. The interface includes a navigation menu with options for Dashboard, Health Information, Applications, Share, and Profile. A footer provides contact information for the Swedish eHealth Agency and links to Terms of Use, Processing of Personal Data, and FAQ.

Difference between 1177 and Hälsa för mig

- All communication within 1177 Vårdguiden is within the Patient Data Act. The healthcare provider is data controller.
- The online Journal is direct access
- Journal information in Hälsa för mig will be a copy that the citizen/patient can use freely
- Civil law – NOT Patient Data Act

Status

- Was (finally!) about to open i May
- Stopped by the Swedish Data Protection Authority (DPA)
 - In court process – appealed by us
- Key questions:
 - How far does the data controller responsibility stretch when it comes to "technical storage", third party applications and "subscription services"
 - The right over your own information – consent
