# Climate Action Planning Framework

- 2015 Paris agreement
- C40's Deadline 2020 report
- C40 develops the Climate Action Planning Framework
- The framework is translated into a Danish municipal context: DK2020

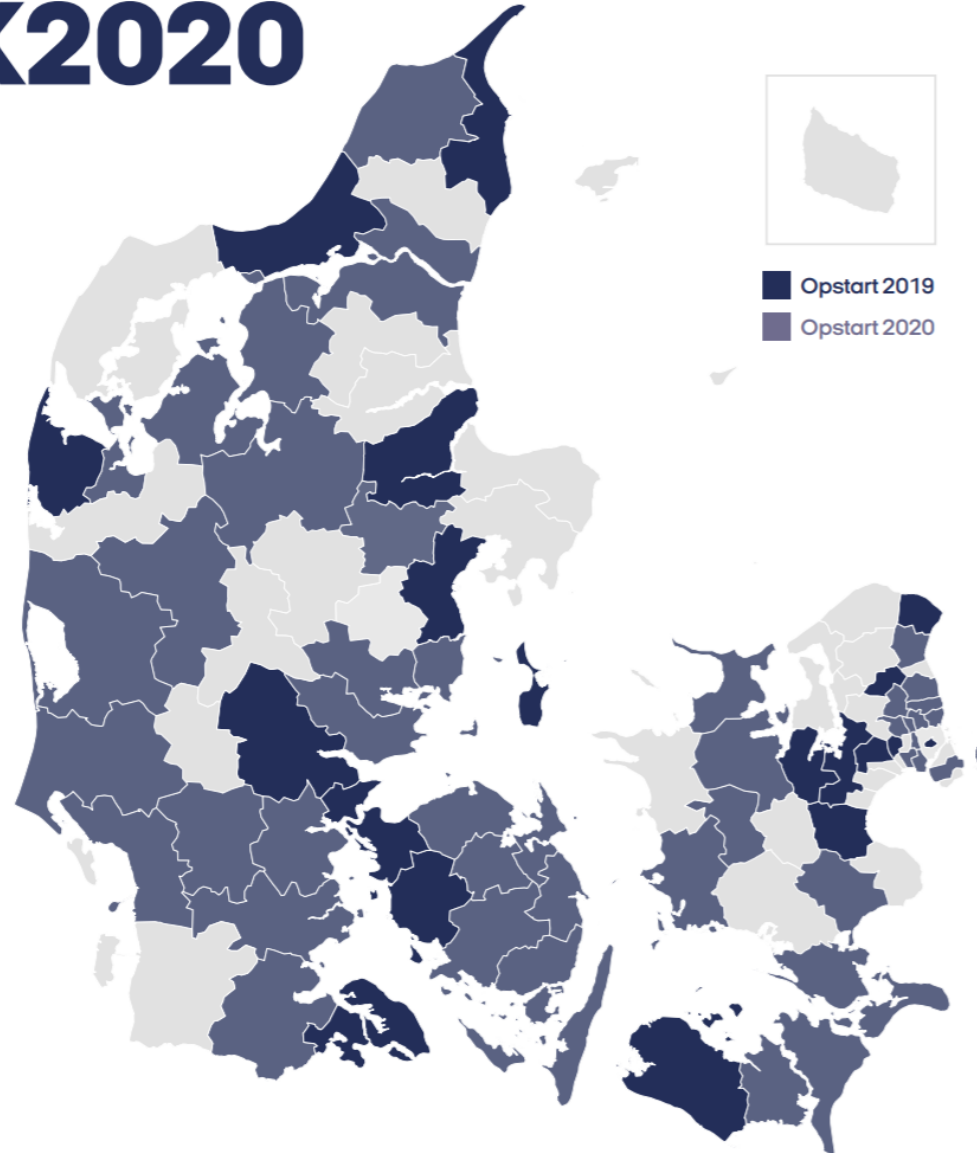

## An initiative growing to become a network

- Support all Danish municipalities to achieve the highest international standard in climate planning on a city level
- Offer a shared framework for climate action planning
- Support “local climate leadership”
- Contribute with knowledge and peer-to-peer work for municipalities
- Contribute to the the national climate ambition and goals

# 65 kommuner i DK2020

## A DK2020 climate action plan must:

› Include specific focus areas that pave the way for net zero emissions by the end of 2050

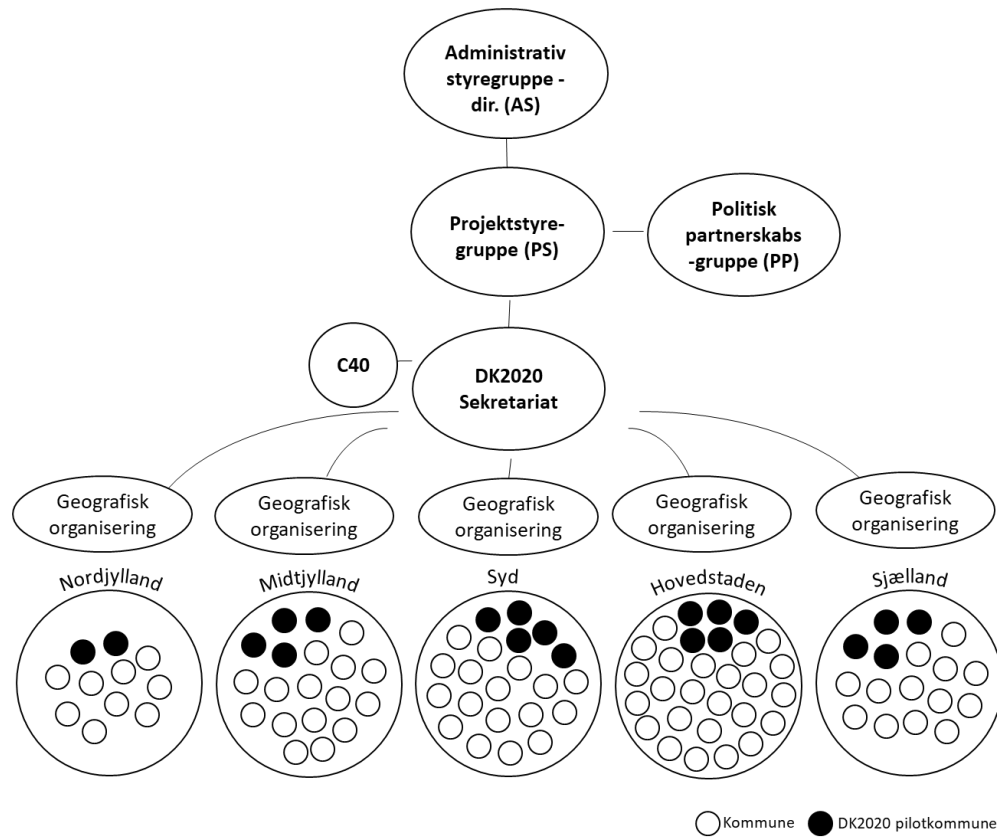

› Illustrate how the municipality plans to adapt to climate change and which areas can be prioritized first

› Outline the social, environmental and economic benefits of the climate plan

› Describe the municipality's resources and the partners that must be involved
