Commissioners: Want to enable national digital tools

- Digital tools & devices that are safe for public use
- Services that are delivered efficiently at National and Local levels with market engagement to exploit existing expertise and innovation

Patients & Citizens: Want access to trusted digital tools

- Trusted health and wellbeing digital tools
- Convenient channels to manage their needs
- Relevant digital content to manage their health/wellth needs

Healthcare Professionals: Want to know which digital tools they can use to:

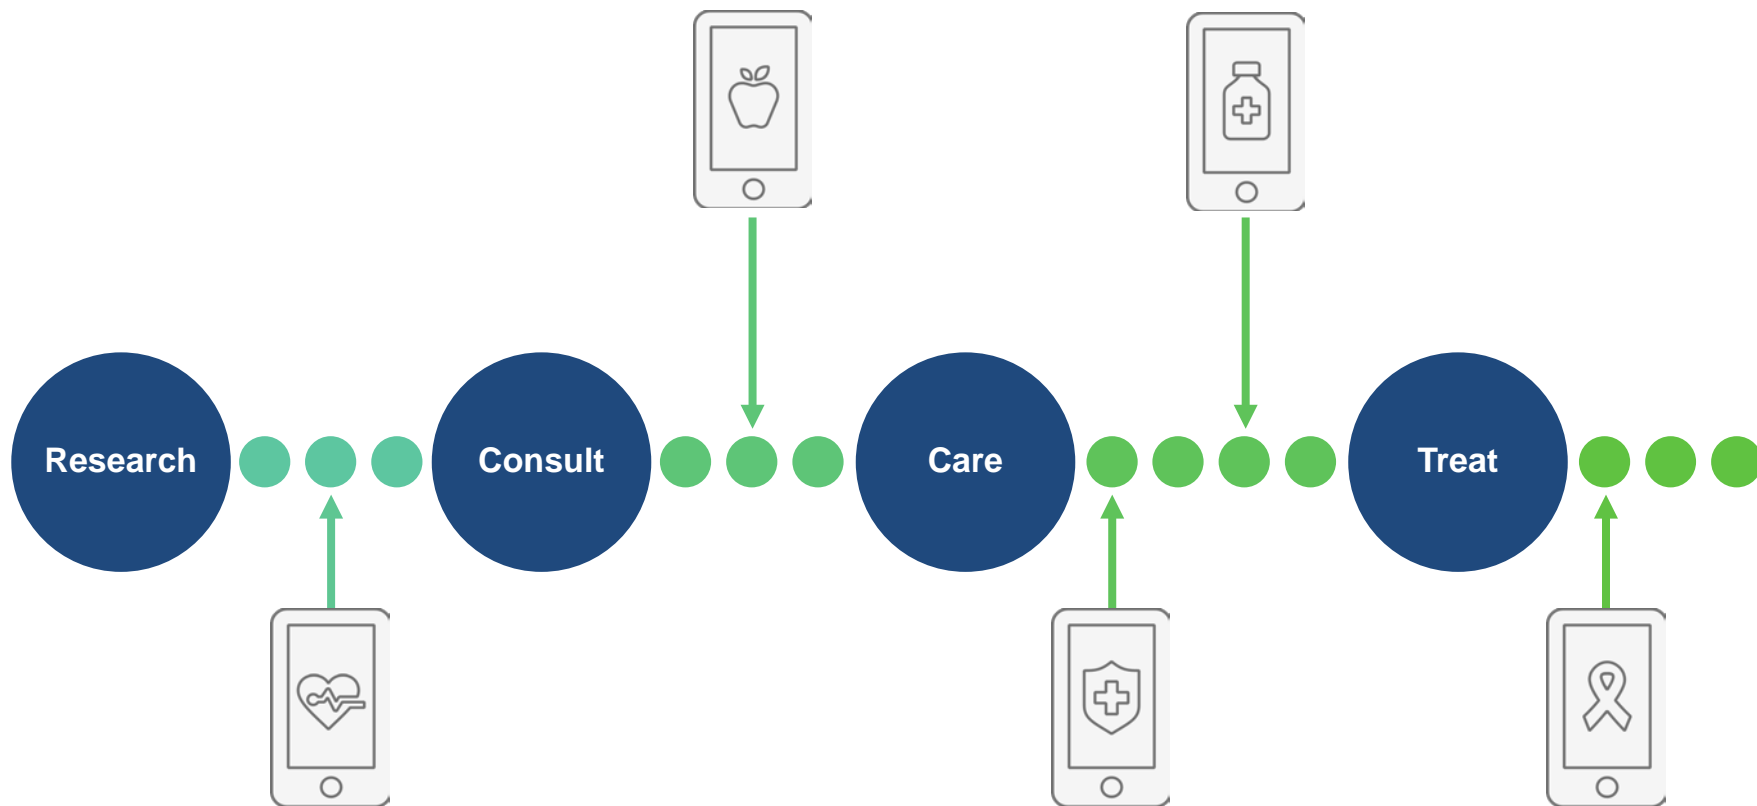

- Offer trusted digital content for advice
- Recommend effective digital tools & devices
- Employ efficient mechanisms for on-going treatment

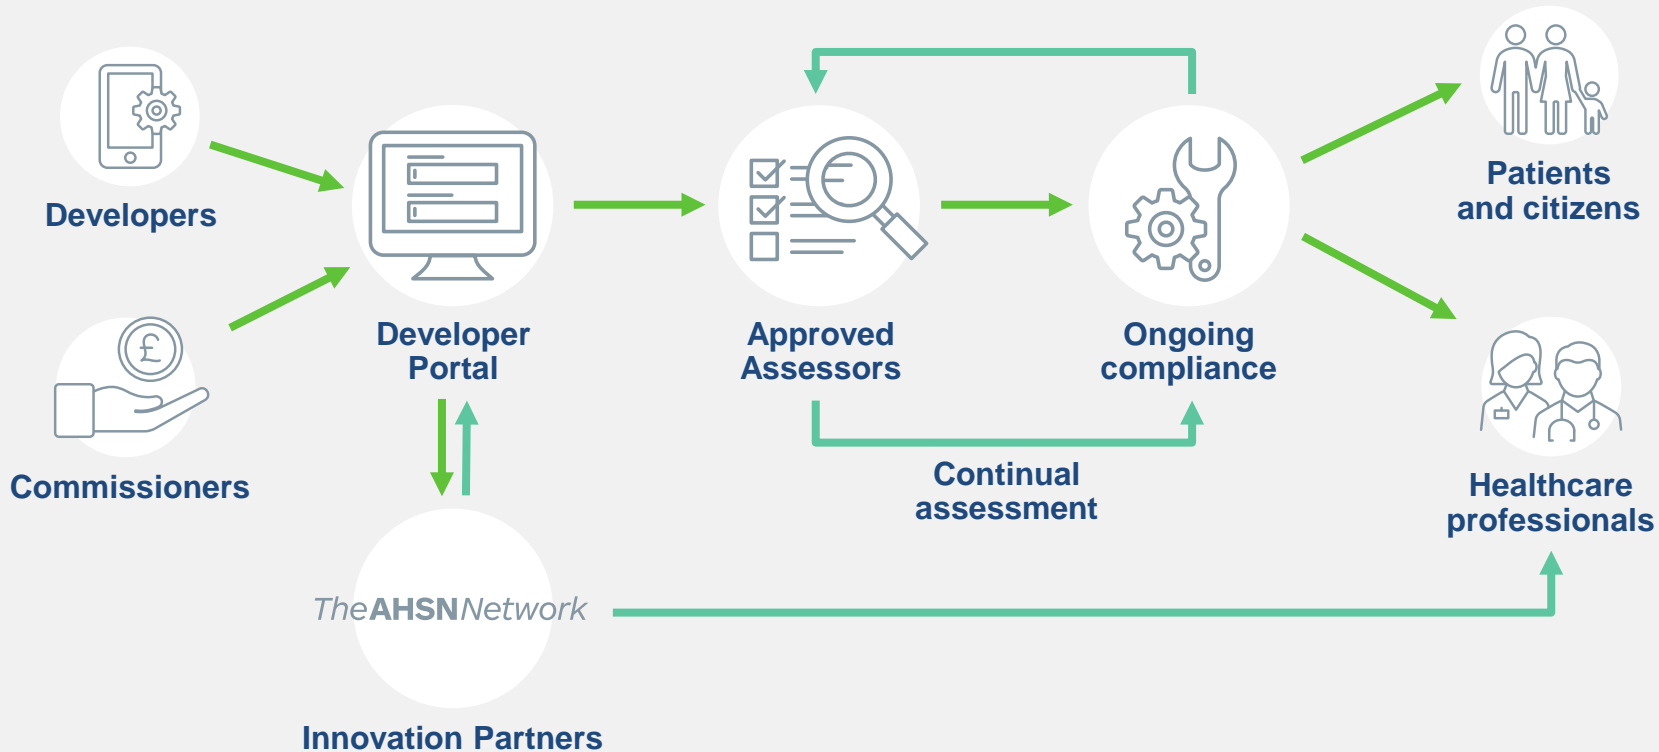

Industry: Want a route to market and a clear path to approval:

- Understand what's required to get their tools approved for use
- Commercial terms to generate revenue
- Support to get their apps approved and published

Enable Health and Social Care Professionals,
Citizens and Patients to access trusted digital
tools to improve health and wellbeing
outcomes

Health A-Z Live Well Care and support Health news Services near you

We're here for you

Helping you take control of your health and wellbeing.

Health A-Z

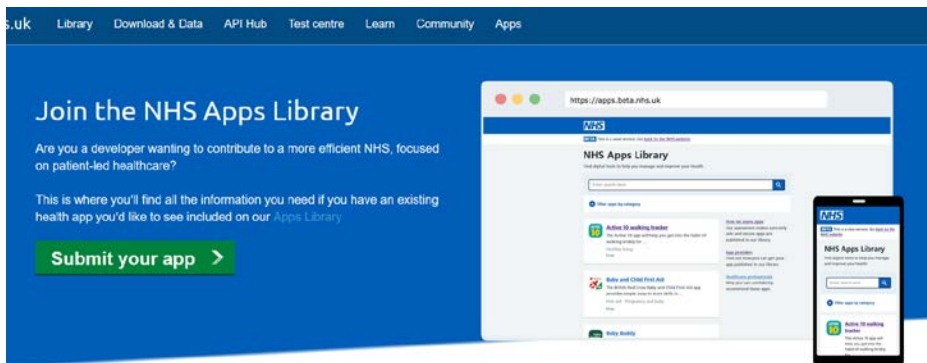

Your complete guide to conditions, symptoms and treatments, including what to do and when to get help.

→ [Go to the Health A-Z](#)

Medicines A-Z

Find out how your medicine works, how and when to take it, possible side effects and answers to your common questions.

→ [Go to the Medicines A-Z](#)

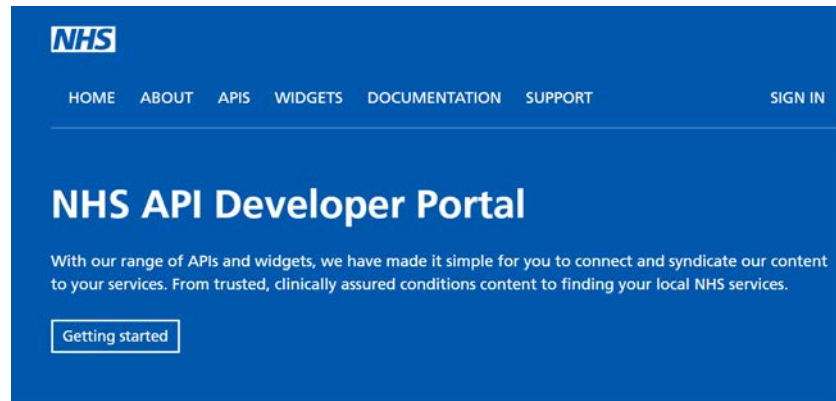

What we're looking for

Our focus for this month is to assess health themes with the most significant need, but please submit your details and you will be contacted when the health priority matches the type of app you're offering

Getting started

This is the process you must undertake to get your app published

- [Submit your app](#)
- [Register your interest](#)

NHS API Developer Portal

With our range of APIs and widgets, we have made it simple for you to connect and syndicate our content to your services. From trusted, clinically assured conditions content to finding your local NHS services.

[Getting started](#)

Get started with APIs today

Our five-step guide will walk you through how to set up and integrate an API into your website, app or service.

[About NHS Digital](#)

[NHS Digital](#) > [Systems and services](#) > [Personal Health Records adoption service](#) > [Personal Health Records adoption toolkit](#)

Personal Health Records adoption toolkit

This toolkit supports health and care organisations in England to commission, develop or manage Personal Health Records (PHRs) and other citizen-facing tools.

[Personal Health Records locations map](#)

Use our interactive map to find contacts for Personal Health Records (PHRs) in England, by location. You can tell us if you know about others.

[Standards for developing Personal Health Records](#)

Recommended standards when developing or buying Personal Health Records (PHRs), for clinical, data, design, security and technical issues.

[Ways to implement Personal Health Records](#)

There are 8 typical ways for organisations to implement Personal Health Records (PHRs). These ways are also known as archetypes.

[How to understand Personal Health Record user needs](#)

It is important to understand what the public and clinicians need when you are buying or developing a Personal Health Record (PHR).

[Guidance for developing Personal Health Records](#)

This good practice guidance can be used when developing Personal Health Records (PHRs). We have grouped the guidance in line with our PHR definition.

[Types of Personal Health Record](#)

There are two types of Personal Health Records (PHRs) available to individuals: tethered and untethered. Untethered PHRs can be integrated or standalone.

[Personal Health Records functionality checklist](#)

This is a checklist of functionality that can be built into a PHR, to help patients and service users to manage their conditions and needs.

[How Personal Health Records relate to other national initiatives](#)

How PHRs relate to NHS login, the NHS Apps Library, Local Health Care Records (LHCRs) and INTEROPen, plus why it matters to you.
